

Titlar lokaritgerða í námi á meistara- og doktorsstigi í sálfræði við Háskóla Íslands haust 2019 til haust 2020 (Flestar ritgerðirnar má nálgast í heild á www.skemman.is)

Doktorspróf í sálfræði (PhD)

30 nóvember 2020.

Inga María Ólafsdóttir. *Þroski sjónrænnar athygli og tengsl við stýrifærni. The development of visual attention and its connection with executive functions*

MS nemar við sálfræðideild árið 2020 eru sem hér segir eftir kjörsviðum:

Cand. psych. ritgerð :

Ólafur Þórðarson. *Íslensk þýðing og áreiðanleiki DSM - 5 útgáfu af the Schedule for Affective Disorders and Schizophrenia for School Aged Children - Present and Lifetime version (K-SADS-PL) Icelandic translation and reliability data on the DSM-5 version of the Schedule for Affective Disorders and Schizophrenia for School Aged Children - Present and Lifetime version (K-SADS-PL)*

MS- ritgerð í Hagnýtri sálfræði, kjörsvið: Klínísk sálfræði:

Anna Guðrún Guðmundsdóttir. *Meðferð við endurteknu þunglyndi á Íslandi: Samanburður á veitingu þunglyndislyfja-meðferðar og hugrænnar atferlismeðferðar. The treatment of recurrent depression in Iceland: A comparison of the application of antidepressant medication and cognitive behavior therapy.*

Arnás Sverrisdóttir. *Þjálfunarnámskeið fyrir foreldra barna með ADHD: Viðbótaráhrif viðtala um daglegar rútínur á svefnvanda. Behavioral management training for parents of children with ADHD: Additive effects of daily routine interviews on sleep problems.*

Ágústa Friðriksdóttir. *Þjálfunarnámskeið fyrir foreldra barna með ADHD: Viðbótaráhrif viðtala um daglegar rútínur á streitu og líðan foreldra. Behavioral management training for parents of children with ADHD: Additive effects of daily routine interviews on parental stress, anxiety and depression.*

Bryndís Þorsteinsdóttir. *Þjálfunarnámskeið fyrir foreldra barna með ADHD: Viðbótaráhrif viðtala um daglegar rútínur á hegðunarvanda. Behavioral management training for parents of children with ADHD: Additive effects of daily routine interviews on disruptive behavior problems.*

Elin Ástrós Þórarinsdóttir. *Áð bera kennsl á einhverfu snemma: Samanburður milli svæða með og án skimunar. Early Detection of Autism Spectrum Disorder: Comparison between Screen- and Non-Screen Regions.*

Guðlaug María Sveinbjörnsdóttir. *Hegðunarbreytingar hjá börnum sem hafa lifað af heilahimnubólgu af völdum malaríu í Malaví og meðferðarsamþykki foreldra í Malaví. Behavioral changes in children in Malawi after recovering from cerebral malaria and treatment acceptability among Malawian parents.*

Helga Jónsdóttir. *Samræmi milli unglinga og foreldra í mati á geðrænum vanda: Niðurstöður úr klínisku göngudeildarúrtaki. Parent-youth agreement on psychiatric diagnoses and symptoms: Results from an adolescent outpatient clinical sample.*

Hrafnkatla Agnarsdóttir. *Gagnreynt mat á fylgiröskunum meðal barna og unglinga með athyglisbrest og ofvirkni (ADHD). Samanburður á matsmannaáreiðanleika DSM-5 K-SADS-PL greininga meðal barna með og án ADHD. Evidence-based assessment of comorbid disorders in children with Attention-Deficit/Hyperactive Disorder (ADHD) Comparing inter-rater reliability data on the DSM-5 version of the Schedule for Affective Disorders and Schizophrenia for School Aged Children in children with and without ADHD.*

Hrund Jóhannesdóttir. *Skimunareiginleikar Tilfinningalistans (RCADS) fyrir börn með og án athyglisbrest og ofvirkni (ADHD): Niðurstöður úr klínisku göngudeildarúrtaki. Screening efficiency of the Revised Child Anxiety and Depression Scale (RCADS) in an attention-deficit/hyperactivity disorder (ADHD) and non-ADHD clinical outpatient sample.*

Íris Sverrisdóttir. *Áhrif nívitundarmiðaðrar hugrænnar meðferðar á hugnæmi hjá fólki með sögu um þunglyndi: Slembivalds rannsókn. The effect of Mindfulness-Based Cognitive Therapy on cognitive reactivity in formerly depressed individuals: A randomized controlled trial.*

Jakob Reynisson. *Andleg líðan fyrir og eftir innliggjandi meðferð við fíknisjúkdómi hjá S.Á.Á. Impact of inpatient addiction treatment on symptoms of depression, anxiety and stress.*

Titlar lokaritgerða í námi á meistara- og doktorsstigi í sálfræði við Háskóla Íslands haust 2019 til haust 2020 (Flestar ritgerðirnar má nálgast í heild á www.skemman.is)

- Jóel Dan Nielsen Björnsson. *Þjónustunýting og vangreining áfallastreituröskunar meðal sjúklinga í geðheilbrigðisþjónustu. The mental health service use and undetected PTSD among psychiatric patients in tertiary care.*
- Kristín Hulda Gísladóttir. *Eigin þunglyndisfordómar og þunglyndisfordómar annarra: Umfang og forspárþættir meðal einstaklinga með og án fyrri sögu um þunglyndi. Personal and perceived depression stigma: Magnitude and predictors in formerly depressed and never depressed individuals.*
- Lára Sigurðardóttir. *Hlutverk viðhorfa í þróun áfallastreituröskunar. The role of appraisal in the development of post-traumatic stress disorder.*
- Nína Björg Arnarsdóttir. *Áhrif nívitundarmiðaðrar hugrænnar meðferð á grúfl hjá fyrrum þunglyndum: slembivals rannsókn. The effect of Mindfulness-Based Cognitive Therapy on rumination tendencies in formerly depressed individuals: A randomized controlled trial.*
- Rósa Björnsdóttir. *Mental health status and service utilization among individuals with and without childhood sexual abuse seeking mental health services.*
- Styrkár Hallsson. *Áhrif nívitundarmiðaðrar hugrænnar meðferðar á nívitund og sjálfs-samkennd og samband þess við þunglyndisþanka hjá fólki með sögu um endurtekna þunglyndislotur: Slembivals-rannsókn. The efficacy of Mindfulness-Based Cognitive therapy in cultivating mindfulness-skills and self-compassion and the association with rumination in people with history of recurrent depression: A randomized controlled trial.*
- Svandís Gunnarsdóttir. *Snemmtæk ihlutun barna á leikskólaaldri meðan beðið er eftir greiningu á frávikum í taugaproska. Early intervention for children in preschool during the time from referral to diagnosis of neurodevelopmental disorders.*
- Unnur Héðinsdóttir. *Dregið úr áleitnum endurminningum eftir áfall með sjónrýmdarverkefni: forþrófun. Reducing the Frequency of Intrusive Memories After Trauma Using a Visuospatial Intervention: A pilot study.*

MS- próf í hagnýtri sálfræði: Meginleg sálfræði:

- Jóhanna Margrét Sigurðardóttir. *Tíðnitölfræði eða Bayesian? Hermirannsókn á samburði á niðurstöðum sennileikameila og Bayesian við þróun langtíma formgerðagreiningar líkans. Frequentist statistics or Bayesian? A simulation study comparing Maximum Likelihood and Bayesian method in creating longitudinal SEM model.*
- Kristín Hulda Kristófersdóttir. *Réttmæti PHQ-9 til skimunar og mats á alvarleika þunglyndis. The Validity of PHQ-9 as a Screener and to Assess Depression Severity.*
- Vera Óðinsdóttir. *Mat á þáttabyggingu og atriðagreining með svarferlalíkani á málferniprófi ungra barna. Evaluation of the Factor Structure and IRT analysis of an Icelandic Preschool Language Development Test.*

MS- próf í hagnýtri sálfræði: Samfélag og heilsa/ Samfélag og umhverfi

- Arnás Eva Finnsdóttir. *Mat á neikvæðum afleiðingum þátttöku í peningaspilum: Gagnsemi Roc greininga til að ákvarða magnbundin mörk fyrir þátttöku í peningaspilum. Gambling-related harm as a function of gambling involvement in the Icelandic public: Examining potential thresholds for Low-Risk Gambling Guidelines.*
- Þórdís Birna Borgarsdóttir. *Þáttabygging og forspárréttmæti endurbættrar útgáfu PB-CCA kvarðans. Factor structure and predictive validity of the revised PB-CCA scale.*

Meistaránám í sálfræði

- Ingunn Eyjólfadóttir. *Ráðgjöf fyrir kennara á internetinu um meðhöndlun á hegðunarfunda nemenda. Evaluation of the effects of a consultation website for teachers*
- Sandra Dögg Þórudóttir. *Spáir skýrleiki hugsýna fyrir um frammistöðu í minnisverkefnum? Does mental imagery vividness predict memory performance?*

Titlar lokaritgerða í námi á meistara- og doktorsstigi í sálfræði við Háskólann í Reykjavík haust 2019 til haust 2020
